

Docker CLI Installation

Step 1:

<https://docs.docker.com/engine/install/>

Click on the above link.

Step 2:

1. Download Docker.
2. Double-click Install Docker.
3. Follow the Install Wizard: accept the license, authorize the installer, and proceed with the install.
4. Click Finish to launch Docker.
5. Docker starts automatically.

6. Docker loads a “Welcome” window giving you tips and access to the Docker documentation.

I’ve Installed and Created Docker Account in our system and environmental setup is done.
